

Between Earth and Sky & Clover Petal

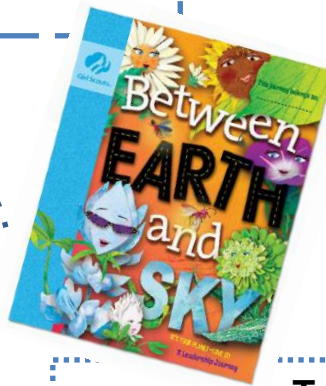

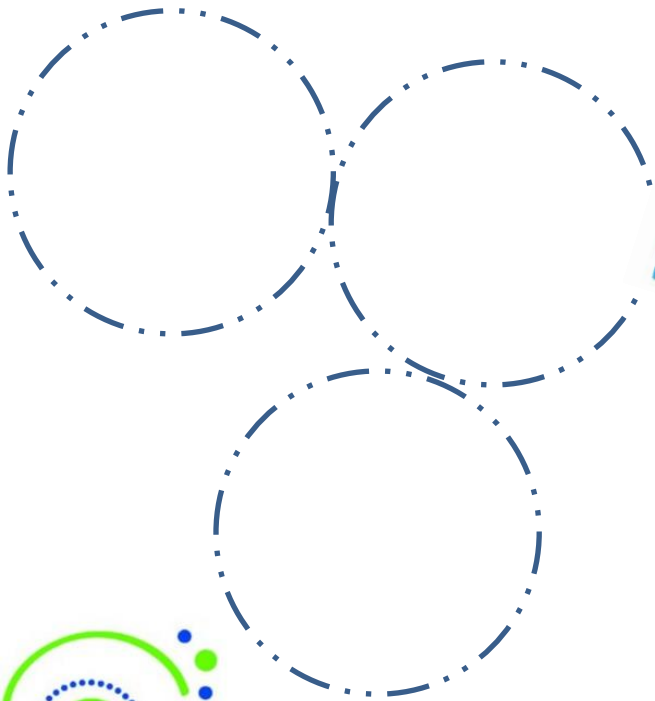

Your Journey

1. **On Your Own:** Keep going! Enjoy what's local and learn why that's important. Girls experience what is great about what grows near them, and they learn how their own special skills make the world a better place on this epic, flower-power journey!
2. **Play in the museum:**
 - a. Go to the 2nd floor Nano Exhibit and investigate how scientists are using nanotechnology by studying plants!
 - b. Pg. 50 Pedal Power and You! On the 2nd floor, use pedal power to light up the Electricity exhibits!
 - c. Pg. 39 The Flower Friends visit Dairyland and you can, too! Head over to the milking cows in the AgZibit!
 - d. Pg. 15 Find the Secret Garden and explore the native plants. In the circles, draw three different leaves that you find!

Your Clover Petal

1. **On Your Own:** Read and talk about Clover's Story
2. **In the AgZibit:** Make a corn husk doll out of repurposed materials
3. **Play in the Museum:** Go to the Energy Exhibit on the 2nd floor. What are 3 ways you can help save energy? (Use your answers below on page 96 of your Journey!)

Take Action Project for Between Earth and Sky

Here are some ideas:

- Plant flowers to help someone within the local community
- Improve upon a landscaped area
- Help someone in the community with picking up leaves
- Volunteer at a local community garden

For more fun, check out www.DiscoveryCenterMuseum.org for Girl Scout Badge Workshops, Camp-ins, and Museum Scout Days!
